ABOUT ME

Second-year BCA student with a strong interest in Data Analysis and data-driven problem-solving. Skilled in Python, SQL, Excel, and data visualization, with a passion for turning data into actionable insights and supporting informed business decisions. Currently applying these skills in a real-world product environment as a Data Analyst Intern.

EDUCATION

Nepal Kasthamandap College | 2025–present

Bachelors in Computer Application

EXPERIENCE

Omnexia Technologies Private Limited, Bengaluru, India | 4 September 2026 – Present

Data Analyst Intern

- Clean, structure and analyse product datasets using Python and SQL to support reporting for Soosial, the company's social media platform.
- Researched and compiled a comparative assessment of 19 central and Karnataka state government funding schemes, mapping eligibility criteria and application requirements into a structured report for the founding team.
- Build visualizations and summary reports that translate findings into clear recommendations for business decisions.

PROJECTS

E-Commerce Data Pipeline

- Built a Python data pipeline to clean, validate, and automate e-commerce product data processing.
- Stored processed data in a SQL database for analysis and reporting.
- Generated automated data quality reports to identify missing, invalid, and inconsistent data.
